By the Editor in Chief

NINE of our own recently received certificates from Zambezi Vocational Training Centre after eight months of training.

Speaking at the occasion, Mr. Kambinda the Centre Manager said he was glad to have worked with Children of Zion Village Mission School students.

He hopes that they will

never abandon the training they had.

After the hand-over ceremony, the Training Officer, Mr. Ndana thanked Children of Zion for choosing the centre.

He also thanked the students for their co-operation during the training.

He said, " My student friends, you are welcome

to ZVTC anytime you complete your grade 10 to continue in your chosen careers."

Fortune Madzime, the Principal of Children of Zion Village Mission School said that his school looks forward to having a long lasting relationship with the Training Centre.

He told the learners that he was happy they

were able to learn and graduate.

Mr. Kambinda, who hails from Musanga, welcomed the Currys to Namibia, Musanga and Katima Mulilo.

He asked them to help the students not to forget what they were taught by giving them things to make and sell at the market.

"When I walk around the market I want to see your works on sale as you were taught here at ZVTC." he said.

The students themselves were overjoyed to have completed the course.

"It required a lot of hard work and time", said one of the graduates.

"I am going to start making some items for sale as well as help Uncle Leonard with maintenance", he promised.

Village Councillors Visit Zion

Students welcome the Indunas in song and dance

THREE most senior traditional councillors, the Chief Induna accompanied by the Local Induna and the Ngambela, visited children of Zion Village on Thursday November 11.

The visit was supposed to take place on Wednesday, but the Chief Induna got tied up with other royal issues.

Children liked the performances they prepared and held for the visitors.

Anna Amy hopes the Indunas loved it after all the effort they put into rehearsals.

She also wants the Indunas to come again and visit.

Most children were pleased to meet the traditional leaders for the first time in their life.

The councillors themselves conceded that the thunderous welcome they got was something new and they appreciate it.

After a tour of the place, they retreated into a closed door meeting with the management.

The press was barred from attending the meeting.

Comment

We have received complaints about our language but this is our position.

We will continue using the same language.

We write for students who can read and are taking etymology as a compulsory course.

We stand firm and stick to our guns.

Among other things, we write to get our vocabulary improved.

If you don't know the meaning of a word used look it up in the dictionary and thereafter take ownership of it.

Always get a dictionary when dealing with words you don't understand.

You will see that it is funny to learn and use the word whenever you talk or write.

That way you expand your own vocabulary and probably get a job reporting for the Chronicle one day.

Learning a new word everyday will improve your vocabulary.
